GENEVA P. DECANO, RPh | PRACTICE PROJECT

Medication Reconciliation Sheet

One clear list of everything a patient takes, so the care team can spot gaps and duplicates

Sample patient is fictional. This sheet is a documentation aid; clinical decisions stay with the provider.

Patient	Date of birth	Date prepared	Allergies
Sample Patient (fictional)	01/01/1970	[date]	Penicillin: rash

Current Medication List

Medication	Dose	Frequency	Prescriber	Source	Action
Metformin	500 mg	Twice daily with meals	[Dr. A]	Prescription	Continue
Amlodipine	5 mg	Once daily	[Dr. A]	Prescription	Continue
Atorvastatin	20 mg	Once daily at bedtime	[Dr. B]	Prescription	Verify dose
Paracetamol	500 mg	As needed	Self	Over the counter	Confirm daily maximum
[Medication]					

Review Checklist

- ☐ Patient name and date of birth verified
- ☐ All prescription, over-the-counter, and herbal products listed
- ☐ Allergies recorded and cross-checked
- ☐ Doses and frequencies match the label or prescription
- ☐ Duplicate or overlapping therapies flagged
- ☐ Unclear items marked for provider or pharmacist review

Flags for Provider Review

- Atorvastatin: dose differs between two sources; confirm with prescriber.
- Paracetamol: confirm how often the patient actually takes it and the daily total.
