Patient Scheduling

A clear, color-coded system for booking, tracking, and billing appointments.

TAB-BY-TAB GUIDE

Settings	Your clinic name, the master status-code legend, and the editable Insurance / Visit Type lists that power every dropdown in this workbook. Set this up first.
Patient Info	One row per patient — contact details, insurance, and any special instructions. This list is what fills the Patient Name dropdown on every other tab.
Patient Visit Info	A running log of completed visits and payments — charge, insurance paid, patient paid, and balance due (calculated for you).
Jan – Dec	One tab per month. Each is a full monthly calendar: pick a start date, start time, and appointment length once at the top, and every time slot fills in by itself.

HOW TO SET UP A MONTH IN 3 STEPS

1.	Open the tab for the month you're scheduling (e.g. Jan). At the top, confirm the Start Date (the 1st of that month), your clinic's opening time, and the length of each appointment slot in minutes.
2.	Every date across the top and every time down the left side fills in automatically — you never type a date or time by hand.
3.	Click into any cell under a date to pick a Status code, Patient Name, and Visit Type from the dropdown. The cell colors itself based on the status you choose.

STATUS CODE LEGEND

This same legend appears on the Settings tab and at the top of every month, so it's always within reach.

C = Confirmed	Patient confirmed and appointment is set
P = Pending	Awaiting confirmation from the patient
S = Special Note	Needs attention — see Notes column
V = Completed	Visit is finished / checked out
X = No-Show	Patient did not come and did not cancel
R = Rescheduled	Moved to a different date/time
O = Cancelled	Appointment was cancelled

TIPS

- Blue text = a cell you're meant to type into or change. Black text is a formula or label — best left as-is.

- To add more patient rows, appointment rows, or an extra month's worth of days, select the last formatted row/column and drag the fill handle — formulas, dropdowns, and colors all carry with it.
- In Google Sheets: File > Import > Upload this file > Replace spreadsheet, to bring everything in with formatting, dropdowns, and color-coding intact.
- To rename or add insurance companies, visit types, or status codes, edit them once on the Settings tab — every dropdown across the workbook updates automatically.

Settings

Set this up once — your clinic name and these lists power every other tab.

Clinic / Practice Name

Your Clinic Name Here

Schedule Year

2027

Type your clinic name and year above — both appear automatically at the top of every monthly tab.
